Basic

Summary

Enthusiastic AI engineer eager to work and delve into the realms of data science, artificial intelligence, and computer sciences. Besides, I love to learn and experiment on my own with anything realted to tech.

Experience

Hewlett Packard Enterprise   Madrid
AI & Data Engineer   **December 2025 - Present**

- Development of multi-GPU inference servers for video generation on AMD MI300x GPUs, utilizing video generation models like Wan2.2.
- Development of agents, RAGs, and conversational assistants using LLMs.
- Develop real time systems to create insights leveraging open source LLMs.
- Fine-tuning of Vision Language Models and applied them for image and video understanding

Hewlett Packard Enterprise   Las Rozas de Madrid
AI Engineer Intern   **March 2025 - December 2025**

Developed GenAI demos with Vision Language Models for video processing and understanding.

Full Stack Developer
Via Radix   **June 2023 - August 2023**

Education

Polytechnic University of Madrid   Bachelor's
Data Science and AI   September 2021 - 2025

Technical University of Munich   Erasmus Exchange
Computer Vision and AI
